Advanced Outdoor Touch Screen Tablet Multi-family Residential Entry Phone System

Introducing our newest 21.5" Outdoor Touch Screen Tablets, purpose-built for multi-family residential building entry phone use.

Experience cutting-edge technology and enhanced functionality with these rugged and weather-resistant tablets, empowering security professionals with intuitive and reliable tools for efficient operations and enhanced situational awareness.

Wide Temperature Range That Outperform On All Fronts

Mondofi's 21.5" tablet series has been tested to withstand harsh conditions and inclement weather. Our Outdoor Displays have the durability & ruggedness to withstand and perform with reliability during extreme temperature fluctuation.

Operating Temperature:

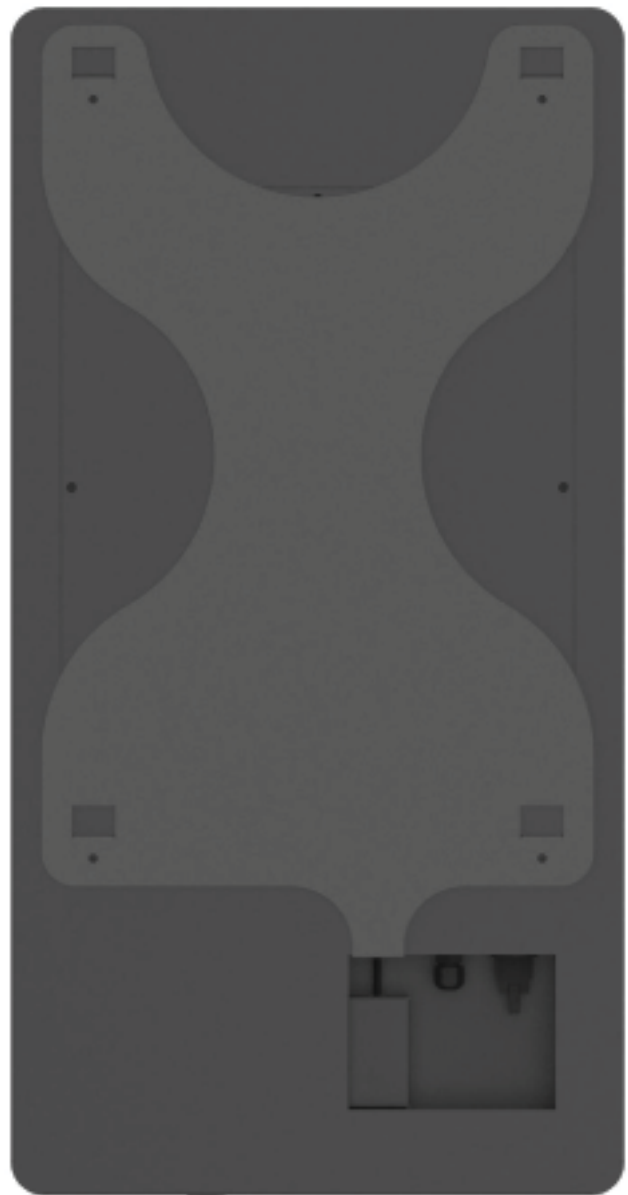

-30° up to 50°C / -22° up to 122° F

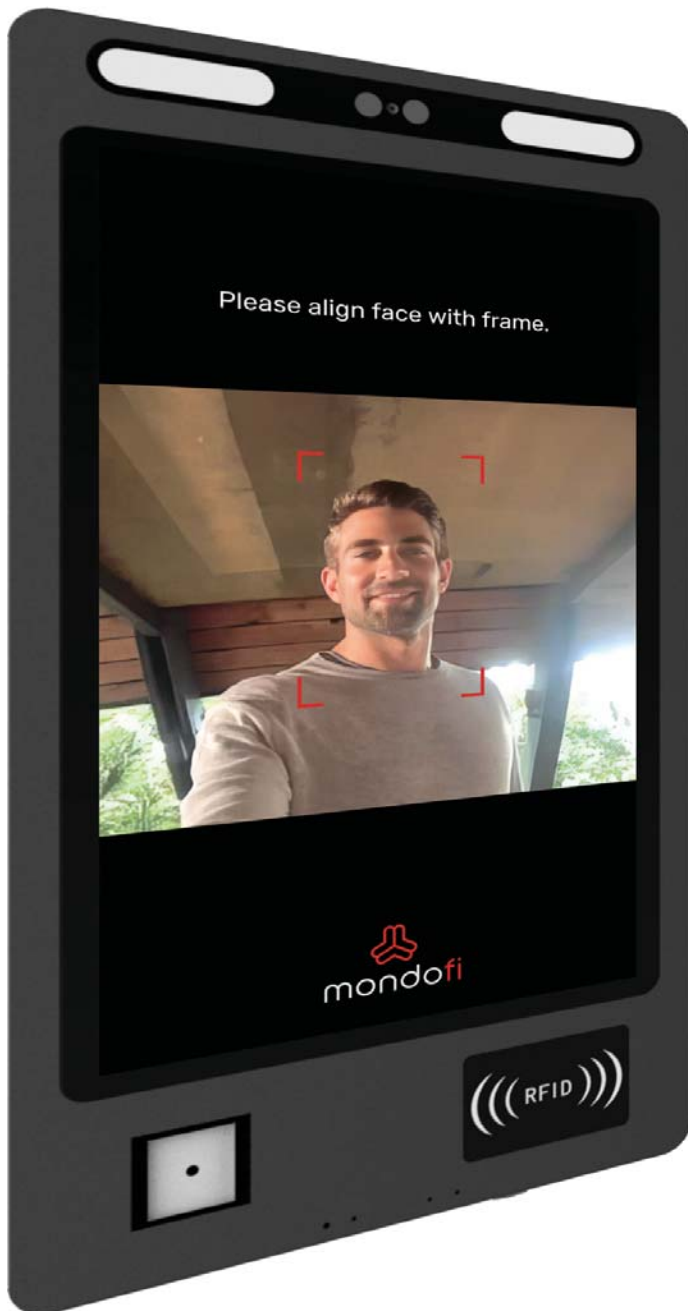

Humidity:

5 to 95%

Secure Your Investment with Anti-Theft Wall Mount Brackets

Our anti-theft wall mount brackets are specifically designed to provide an added layer of security for your valuable devices. With a sturdy construction and innovative locking mechanism, these brackets ensure that your devices are securely mounted and protected against theft or tampering. Rest easy knowing that your investment is safeguarded with our reliable and durable anti-theft wall mount brackets. Recessed & flush mounting is possible.

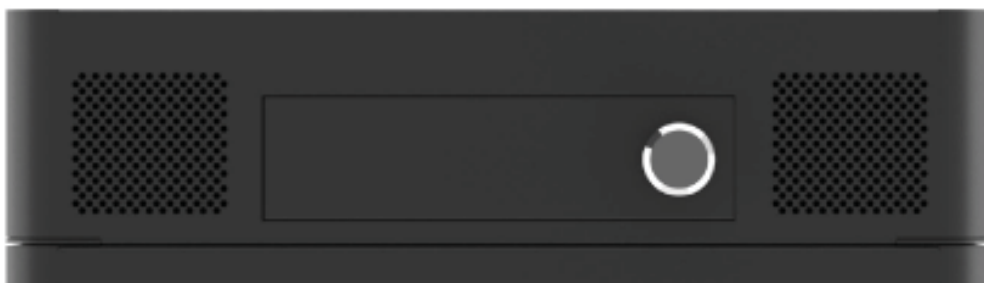

High-Definition Camera with Optional Face Recognition

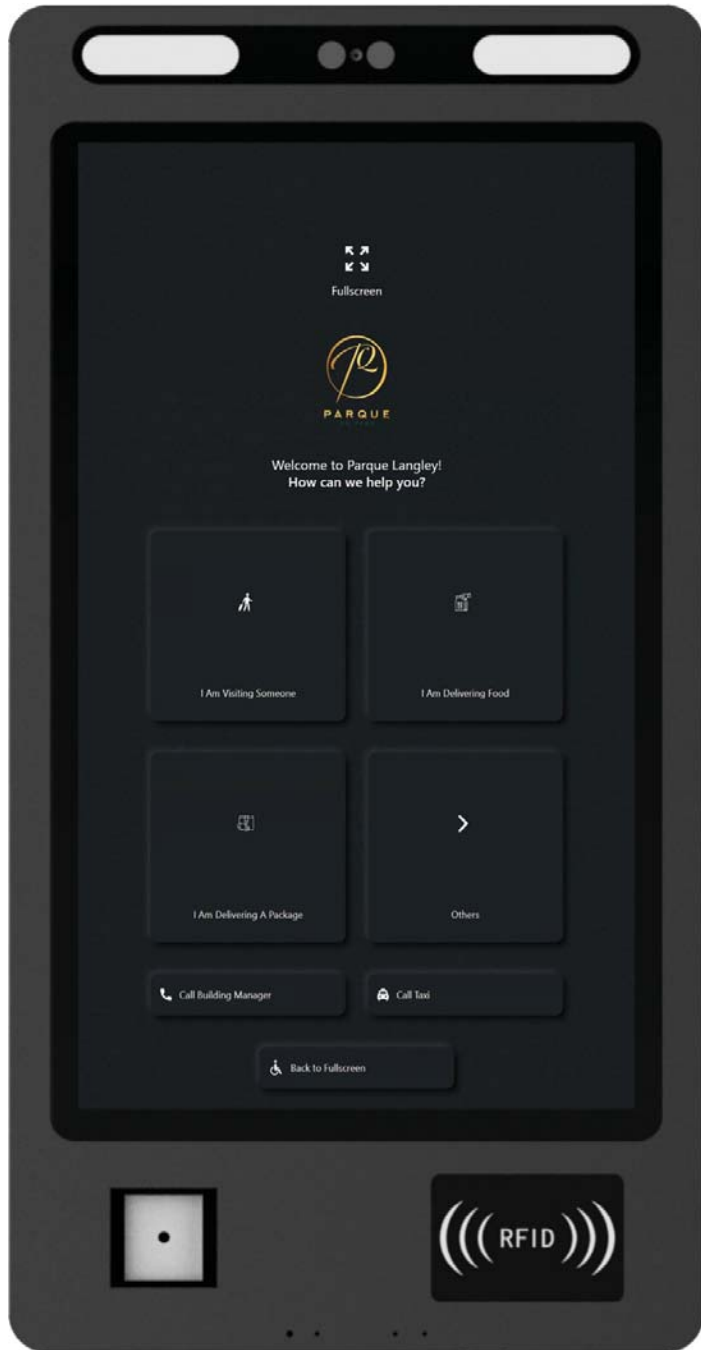

The Mondofi 21.5" Outdoor Touch Screen Tablet is equipped with a high-definition camera, capturing clear and detailed images. Additionally, we offer an optional face recognition camera feature, enabling advanced security and access control functionalities. With the face recognition camera, authorized individuals can conveniently unlock doors or access restricted areas, adding an extra layer of convenience and safety.

Upgrade your security measures with the Mondofi tablet's high-definition camera and optional face recognition capability.

Enhanced Communication with Integrated Loudspeakers and Microphone

The Mondofi 21.5" Outdoor Touch Screen Tablet is designed to facilitate seamless communication between visitors and residents. Equipped with integrated loudspeakers and a microphone, this feature-packed enclosure allows clear and convenient two-way communication. Visitors can easily communicate with residents, making it effortless to provide instructions, seek assistance, or engage in conversation.

Streamlined Access Control with RFID NFC Card Integration

The Mondofi 21.5" Outdoor Touch Screen Tablet incorporates RFID NFC card capabilities, providing a streamlined access control solution for security companies. The Mondofi tablet's RFID NFC card functionality allows for efficient identification and authentication, eliminating the need for manual entry or physical keys. This enhances security protocols and simplifies access management processes, making it an ideal solution.

Withstanding the Elements: Built to IP65 Ingress Protection Standards

When it comes to outdoor digital signage, durability is paramount. That's why our Mondofi 21.5" Outdoor Touch Screen Tablets are engineered to meet the rigorous IP65 Ingress Protection Rating Standard. This ensures its resilience against a wide array of environmental challenges, allowing it to excel in any setting.

Our Display has undergone thorough testing in extreme environments to guarantee its ability to withstand the harshest conditions. It triumphs over humidity, dust, rain, wind, dirt, and the relentless glare of direct sunlight. No matter where you deploy it, from the freezing cold of Minnesota to the scorching heat of Phoenix, and even the high humidity of Houston or Miami, our Display stands strong.

Rest assured that our IP65-rated Display is ready to brave the elements, delivering uninterrupted performance and maintaining its exceptional visual quality. Experience peace of mind knowing that your digital signage investment is protected against the most demanding outdoor conditions.

Integrates seamlessly with the Mondofi mobile app & administrative interface

Each install of the Mondofi Outdoor Touch Screen Tablet Entry Phone System comes with a subscription to the Mondofi administrative interface and allows buildings to offer the ease & convenience of the Mondofi user mobile app to its tenants.

The Mondofi administrative interface is an easy-to-use portal accessible via any web browser. It allows building ownership, management, concierges or strata management companies a simple & effective way to manage mobile-enabled access to entrances along with other wired doors in the building.

The Mondofi mobile resident app is also easy-to-use and is available for residents in any Mondofi-enabled building. Residents can grant or deny access to dial-ins from the building's Mondofi entry phone system, manage the visibility of their names on the system's touch screens, enable & disable call forwarding, use one-button click functionality to remotely open any authorized, wired door in their building and view a live video stream of inbound dial-ins from building entrances.
